Classic chicken nuggets from Miratorg

Classic chicken nuggets are a harmonious combination of juicy chicken fillet and golden breading. It is not easy to prepare them at home; you will have to spend a lot of time and effort. So that you can enjoy the traditional taste of this hearty and tasty dish, we have created a finished product for you. Classic nuggets from Miratorg just need to be warmed up.

Why do our products have no analogues?

The Miratorg company is the No. 1 manufacturer of nuggets in Russia. To make the product, we use chicken meat from our own farms in Russia. We control every aspect of nugget creation - from hatching chicks in the incubator to packaging the finished product.

The diet of our broilers consists of natural grain feed of our own production. They do not contain hormones or growth stimulants. This allows us to ensure that the product meets the highest safety standards. Miratorg cares about your health.

To make nuggets, we use the most valuable delicacy parts of the chicken - tender and juicy breasts.

Advantages of classic nuggets from Miratorg

- Tasty, like at home, and convenient, like in a restaurant. Nuggets from Miratorg are a delicious homemade product that you don't need to spend time and effort preparing. Just heat the dish and enjoy its delicious taste.
- Harmonious taste. We prepare nuggets according to a traditional recipe. The chicken fillet always remains juicy thanks to the crispy Milanese breading. It consists of ground wheat crackers, durum wheat flour and fresh eggs. A golden crust covers each piece of meat, complementing its delicate taste.
- Long shelf life. The product remains fresh for 425 days at a temperature of -18°C.
- No preservatives. Blast freezing technology allows you to preserve the freshness and taste of the product without the use of preservatives. Nuggets retain their color, shape, texture, remaining crispy on the outside and juicy on the inside.

Classic nuggets from Miratorg are a product for those who want to cook quickly and effortlessly. We will help you look at the process of creating a delicious dinner differently. Anyone can cope with this task, even if you don't like or don't know how to cook.

Compound:

filling: potatoes, mushrooms, onions, table salt; dough: premium wheat flour, drinking water, egg melange, table salt, sunflower oil.

Product Description:

Marbled beef fat is an excellent substitute for vegetable oil. Thanks to its rich taste, beef fat will complement any of your dishes. The product is ideal for frying steaks and other foods, preparing sauces and cooking soups.

Beef fat differs from vegetable oil in its rapid fusibility (melting point ~70 - 80 C), rich beef taste, and fat is easily removed from the body.

Advantages:

- An alternative to vegetable oil
- Pleasant taste and smell
- Used for preparing various dishes (soups, sauces)
- Makes the dish more creamy and buttery
- Grilling or frying

- Taurine – 289 mg/100 g

Energy value: 394 kcal

Feeding recommendations

| Cat weight, kg | 2,5 | 3 | 3,5 | 4 | 5 | 6 | 7 | 8 |
|-------------------------|-----|----|-----|----|----|----|----|-----|
| Feed rate, g/day | 47 | 53 | 59 | 64 | 75 | 84 | 93 | 102 |

Special instructions: Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The duration of the course of diet therapy for diseases of the gastrointestinal tract depends on the diagnosis and can range from 2 to 24 weeks. For a more effective effect of diet therapy, it is recommended to follow a fractional feeding regimen: divide the daily intake into several feedings and offer it to your pet at regular intervals (every 4-6-8 hours). Make sure your pet always has clean drinking water.

Contraindications:

Pregnancy, lactation, growth*

Individual intolerance

*under the supervision of a veterinary nutritionist

Complete dry food for adult cats of all breeds with kidney disease "Gentle care for kidney health"

MIRATORG EXPERT RENAL Complete dry food "Careful care for kidney health" for adult cats of all breeds was created to be included in a complex therapy for kidney diseases. Low protein content and limited phosphorus content help slow the progression of kidney failure. The high calorie content helps to quickly

saturate the pet with a small serving size. Antioxidants and optimal mineral composition prevent the development of renal acidosis and hypertension in the later stages of the disease. High palatability prevents and slows down the progression of hypo- and anorexia in the later stages of the disease.

Indications for use:

- acute renal failure*
- chronic renal failure**
- prevention of metabolic acidosis and maintenance of optimal urine pH***

Product weight: 0.4 kg/1.5 kg.

Best before date: 540 days.

Ingredients:

rice, vegetable protein extract, fresh chicken breast - 13%, animal fat, corn, dehydrated egg, salmon oil, hydrolyzed animal proteins, brewer's yeast, dietary fiber (including chicory extract), flax seeds, calcium carbonate, minerals, potassium citrate, dried beet pulp, salt, vitamins, psyllium seeds, mannan oligosaccharides (MOS), marigold extract, Yucca Schidigera extract.

Nutrient content per 100 g:

- Protein – 26.0%
- Fat – 17.0%
- Ash – 4.6%
- Fiber – 3.0%
- Calcium – 0.6%
- Phosphorus – 0.4%
- Omega 3 – 0.8%
- Omega 6 – 2.4%
- Moisture – 6.0%

Added substances:

- Vitamin A – 25,000 IU/kg
- Vitamin D3 – 1,000 IU/kg
- Vitamin E - 600 mg/kg
- Vitamin C - 200 mg/kg
- Vitamin K3 – 1.4 mg/kg

- Vitamin B1 – 7.6 mg/kg
- Vitamin B2 – 4.1 mg/kg
- Vitamin B3 – 39 mg/kg
- Vitamin B4 – 3,486 mg/kg
- Vitamin B5 – 6.2 mg/kg

- Taurine – 240 mg/100 g

Energy value: 404 kcal.

Feeding recommendations

| Cat weight, kg | 2,5 | 3 | 3,5 | 4 | 5 | 6 | 7 | 8 |
|-------------------------|-----|----|-----|----|----|----|----|-----|
| Feed rate, g/day | 46 | 52 | 57 | 63 | 73 | 82 | 91 | 100 |

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The minimum period of diet therapy is 26 weeks. The duration of the course depends on the diagnosis and clinical condition of the pet. If the diagnosis of renal failure is confirmed or if it progresses, the diet can be used for life. Regular monitoring of the pet's condition is recommended, in particular, the general clinical condition, changes in blood, urine, blood pressure and ultrasound signs of a previously diagnosed disease.

Contraindications:

Pregnancy, lactation, growth*

Individual intolerance

*under the supervision of a veterinary nutritionist

** recommended for use from stage II according to IRIS

*** prevention of the formation of struvite type uroliths.

Chicken nuggets with cheese

Product Description

The most delicate cheese gives the nuggets a seductive aroma and a rich, piquant taste, and the golden Milanese breading preserves the juiciness of selected chicken fillet. Bon appetit!

The nutritional value: proteins - 11 g, fats - 9.6 g, carbohydrates - 20.5 g.

Energy value: 206.5 kcal / 865.5 kJ.

Product weight: 300 g.

Best before date: 425 days.

Storage conditions: up to -18°C.

Compound:

frozen chicken breast fillet, drinking water, breadcrumbs (wheat flour, drinking water, salt, yeast, turmeric, annatto dye, emulsifiers (mono- and diglycerides of fatty acids, esters of glycerol and diacetyltartaric and fatty acids)), processed product with cheese [drinking water, special-purpose fat (refined, deodorized, hydrogenated, interesterified vegetable oils (sunflower, rapeseed), potato starch, skimmed milk powder, complex food additive (emulsifiers (sodium polyphosphate, sodium dihydrogen pyrophosphate), acidity

regulators (3-substituted sodium citrate, bicarbonate sodium), cheese (pasteurized milk, bacterial starter of mesophilic lactic acid bacteria, milk-clotting enzyme preparation of microbial origin), salt, flavoring, carotene dye, acidity regulator citric acid], refined deodorized sunflower oil, breading mixture (wheat flour, salt, guar thickener gum, potato starch), edible soy fiber, pea starch, isolated soy protein, salt, acidity regulator sodium triphosphate (5-substituted), stabilizers (sodium pyrophosphate, potassium pyrophosphate), flavoring, antioxidant ascorbic acid, L-

Chicken nuggets with cheese from Miratorg

Tender pieces of chicken fillet stuffed with melted aromatic cheese, fried in golden breading with spices. You will find all this in nuggets from Miratorg. The product is ready to use! To enjoy the balanced taste of the dish, you just need to reheat it. Nuggets go well with sour cream and sweet and sour sauces, various side dishes and salads.

What are nuggets made of?

Chicken nuggets with cheese from Miratorg consist only of natural healthy products, so appetizing pieces of chicken fillet with a crispy crust are suitable for healthy and baby food.

- Tender chicken fillet. We produce it from chicken meat raised on our own farms. The company launched a line for the production of feed mixtures for birds without GMOs and hormones. Our products are absolutely safe for the health of customers.
- Crispy breading. The golden crispy crust on our nuggets is prepared according to the classic Italian Milanese breading recipe. It is a mixture of crushed wheat crackers, fresh eggs and durum wheat flour.
- Processed cheese. Natural fresh cream cheese without dyes, flavors, or flavor enhancers.

Benefits of chicken nuggets with cheese from Miratorg

- Fast and easy. Our nuggets make it easy to prepare a delicious dinner for the whole family. Heat the product from Miratorg in the microwave or in a frying pan.
- Harmonious combination of ingredients. Soft cream cheese perfectly complements the taste of chicken fillet, giving the meat a more delicate texture and a piquant aftertaste. The crispy coating retains the juiciness of the chicken.
- Long shelf life. The packaged product remains fresh for 425 days.
- Blast freezing. The technology of quick freezing of the product at a temperature of -45 degrees preserves its freshness and taste, so we do not use preservatives. At the same time, the crust remains crispy and the meat remains juicy.

With the line of finished products from Miratorg, everyone can become a professional chef. You will be surprised to learn how easy it is to prepare a filling, healthy and delicious dinner. Just heat up the nuggets and we'll do the rest for you.

Chicken nuggets with ham

The nutritional value: proteins - 12.6 g, fats - 9.5 g, carbohydrates - 18.1 g.

Energy value: 208.1 kcal / 871.5 kJ.

Product weight: 300 g.

Best before date: 425 days.

Storage conditions: no higher than -18°C.

Compound:

frozen chicken breast fillet, drinking water, breadcrumbs (wheat flour, wheat starch, salt, yeast, drinking water, emulsifiers (mono- and diglycerides of fatty acids, esters of glycerol and diacetyltartaric and fatty acids), turmeric, annatto dye, flavoring), sausage product boiled from poultry meat ham (frozen chicken meat, drinking water, salt, potato starch, ground spices and spice extracts (garlic, black pepper, white pepper, allspice, cumin, coriander, nutmeg flower), acidity regulators (sodium dihydrogen pyrophosphate ,

trisodium phosphate (5-substituted)), thickeners (xanthan gum, guar gum), dietary fiber (bamboo), processed product of collagen-containing raw materials (dried animal protein beef), gelling agent potassium chloride, flavor and aroma enhancer monosodium glutamate 1- substituted, flavorings, nitrite-curing mixture (salt, color fixative sodium nitrite), carmine dye, sugar), refined deodorized sunflower oil, breading mixture (wheat flour, salt, thickener guar gum, potato starch), edible soy fiber, starch pea, isolated soy protein, salt, acidity regulator sodium triphosphate (5-substituted), stabilizers (sodium pyrophosphate, potassium pyrophosphate), flavoring, antioxidant ascorbic acid, L-

Chicken nuggets with ham from Miratorg

Chicken nuggets are pieces of tender poultry fillet filled with juicy, aromatic ham, cooked in Milanese breading. The dish is already prepared, and all you have to do is heat it up to enjoy the amazing taste. Nuggets go well with cheese and sour cream sauces.

What are nuggets made of?

Chicken nuggets with ham contain only natural selected products without preservatives or dyes.

- Tender chicken fillet. To produce poultry products, we raise chickens on the territory of high-tech complexes in the Bryansk region. The broiler diet consists of feed that we produce in our own factory. Grain for these purposes is grown in our fields under the supervision of experienced agronomists. The absence of hormones and growth stimulants in feed mixtures allows us to guarantee the safety of our products. Careful and humane treatment of chickens in combination with a balanced natural diet ensures high taste properties of the meat.
- Crispy Milanese breading. It is prepared from a mixture of wheat crackers, flour and fresh eggs with the addition of garlic and aromatic spices.
- Ham made from natural meat. Slices of fresh tender ham without preservatives, dyes or flavorings.

Benefits of chicken nuggets with ham from Miratorg

- Time saving. The nuggets are already ready. To enjoy their taste, just heat the product in a frying pan, microwave or oven for 4-6 minutes.
- Balanced taste. The crispy breading keeps the meat juicy, and the tender ham makes the fillet even tastier and more aromatic.
- Long shelf life. High-tech packaging ensures product freshness for 425 days.
- Blast freezing. Thanks to the use of this technology, the product retains its taste without the use of preservatives.
- All nuggets in the package are the same size, so they heat evenly.

Storage conditions: no higher than -18°C.

Compound:

processed product with cheese [drinking water, milk fat substitute (refined, deodorized, interesterified vegetable oils (sunflower, rapeseed), antioxidant E306), cheese (pasteurized milk, milk-clotting enzyme preparation of animal origin (rennet), sealant E509, preservative E251,

bacterial starter mesophilic lactic acid bacteria), milk protein concentrate, complex food additive (thickeners (E1422, E1420), emulsifier E452(i), emulsifying salt E339(ii), gelling agents (E407, E508), fructose, whey powder, salt, flavorings , preservative E202], a milk-containing product with a milk fat substitute, produced using semi-hard cheese technology [pasteurized skim milk, milk-clotting enzyme preparation of microbial origin, bacterial fermentation of mesophilic and thermophilic lactic acid bacteria, milk fat substitute (refined deodorized hydrogenated, interesterified vegetable oils (sunflower, rapeseed, soybean, palm), antioxidant E306), drinking water, acidity regulator E340, salt, preservative E202], drinking water, breadcrumbs (wheat flour, drinking water, salt (contains anti-caking agent E535), yeast, turmeric, annatto dye), refined deodorized sunflower oil, starches (potato, corn), thickeners (E1422, E415, E464, E466, E1412), leavening agent E500(ii), acidity regulator E450(i), maltodextrin, complex food additive (white distilled vinegar powder (derived from sugar cane), acidity regulator E524)

Lasagna Bolognese with cheese in Bechamel sauce

Description

The original recipe for the classic Bolognese lasagne was created in Italy. The dish was so loved by people all over the world that it became international. It consists of a thin, tender dough, between which there are layers of minced beef fried with ripe tomatoes and basil. The highlight of the lasagna is the delicious creamy Bechamel sauce with a slight hint of nutmeg, which permeates it, making it juicy and aromatic. Grated cheese is sprinkled on top of the dish so that at high temperature it melts to a fragrant crust.

We made sure that everyone could enjoy the original taste of the dish without effort, and created for you lasagna Bolognese with cheese in Bechamel sauce. The dish is already ready, you just need to heat it up.

Product weight: 350 g.

Best before date: 12 months.

Storage conditions: up to -18 C.

The nutritional value: Fats - 6.4 g, Proteins - 7.5 g, Carbohydrates - 17.1 g

Energy value: 623.0 kJ/ 148.8 kcal

Compound:

Bolognese sauce (beef, pork, mechanically separated chicken, tomatoes, drinking water, carrots, onions, red peppers, refined deodorized sunflower oil, thickener (corn starch), premium wheat flour, sugar, salt, mixture Italian herbs (oregano, basil, marjoram, rosemary, savory, thyme, sage), dried garlic, ground sweet paprika, black peppercorns, ground coriander, dried parsley, ground cumin, natural food flavoring “Beef”), lasagne dough (durum wheat flour, water, egg white), Bechamel sauce (drinking water, butter mj 72.5%, premium wheat flour, whole milk powder mj 26%, sugar, thickener (corn starch), salt , nutmeg), semi-hard cheese mj 50% (milk, mesophilic starter organisms, milk-clotting agent of microbial origin, salt, sealant (calcium chloride)).

The company uses processed products: milk, gluten, celery, nuts, sesame, mustard, soy, eggs, fish, crustaceans and shellfish.

Product advantages

- Natural products. The main ingredient of the dish filling is minced meat made from selected beef. Other components of the dish are also carefully selected - ripe tomatoes, delicate cheese, fresh cream. Miratorg lasagna contains no flavor enhancers, flavors or dyes.
- Minimum effort. The dish is already prepared; you only need a few minutes to heat it in the oven or microwave.
- Excellent taste. We prepare lasagna Bolognese in bechamel sauce according to a traditional recipe, using original spices and the best products. Tender meat, stewed tomatoes and layers of thin dough in a creamy filling - a delight for true connoisseurs of taste!
- “Shock” freezing. The taste and freshness of the product are preserved for a long time thanks to the use of flash freezing technology. We do not use preservatives.
- Convenient packaging. The product is placed in an airtight tray, which can be used to reheat Miratorg lasagna.

We have created our line of ready-made products so that you can enjoy the taste of delicious dishes without effort and time!

Product Description:

A mixture with a rich taste and aroma, prepared from selected "A" category vegetables. We prepare it using blast freezing technology, which retains 30–50% more vitamins in vegetables than in “fresh” fruits stored in the warehouse. Simple, tasty and very healthy - enjoy!

Complete dry food Miratorg MEAT with lamb

Soy and GMO free. High meat content and optimal protein content provide your pet with a complete set of amino acids. The combination of fatty acids and zinc promotes healthy skin and a beautiful pet's coat.

Active components:

1. Zinc supports skin collagen synthesis.
2. Omega-6 from salmon oil prevents dry skin.
3. A harmonious combination of micronutrients is necessary to maintain the barrier function of the skin.
4. Optimal protein content ensures healthy skin and beautiful coat of the pet.

5. Vitamin E is a powerful antioxidant to protect body cells.

6. A balanced calcium/phosphorus/magnesium/methionine complex maintains optimal urine pH and helps prevent urolithiasis.

Description:

Due to the textured golden breading, our new nuggets are visually very similar to “the same ones” that we are used to taking with sauce and French fries. Our nuggets are both a hot appetizer and a full-fledged hot dish made from the most tender chicken fillet.

The nutritional value: proteins - 12.7 g, fats - 9.3 g, carbohydrates - 14.5 g.

Energy value: 192.2 kcal/804.6 kJ.

Product weight: 250 g.

Best before date: 426 days

Storage conditions: Not higher than - 18°C

Composition:

frozen chicken breast fillet, drinking water, refined deodorized sunflower oil, flour (wheat, corn), wheat semolina, natural flavors (contain gluten), salt, wheat gluten, starches (potato, corn, tapioca, rice, wheat, pea) , yeast, sugar, ground spices (celery, black pepper, white pepper), spice extract, dry lemon, raising agents (sodium carbonate, sodium bicarbonate), ascorbic acid

Description:

Try unusual nuggets made from... potatoes with a golden brown and crispy crust. They are lush, aromatic and, of course, very tasty. Round-shaped potato nuggets are easy to dip into your favorite sauce and are ready to become a delicious snack or an excellent side dish.

The nutritional value: proteins - 3 g, fats - 8.5 g, carbohydrates - 17.6 g.

Energy value: 159.2 kcal / 666.6 kJ.

Product weight: 250 g.

Best before date: 365 days

Storage conditions: Not higher than - 18°C

Composition:

potatoes, refined deodorized sunflower oil, breading mixtures [flour (wheat, rice), breadcrumbs (wheat flour, salt, yeast), starches (corn, potato), salt, raising agents (sodium dihydrogen pyrophosphate, sodium bicarbonate), stabilizer xanthan gum, refined deodorized sunflower oil], drinking water, dry potato puree (fresh potatoes, stabilizer mono- and diglycerides of fatty acids), onion, salt, dry egg white, thickeners (E464, konjac gum), dextrose, onion powder, pepper white ground.

Description:

Juicy, aromatic onions in a golden breading that does not tear when frying - this is our delicate and aromatic onion rings. They do not stick together when frying, their breading does not crack, the filling does not leak, and the bright taste will harmoniously complement absolutely any sauce. Our onion rings are eaten faster than they are cooked, and will appeal to taste when you are bored with the usual snack solutions.

The nutritional value: proteins - 4.5 g, fats - 10.2 g, carbohydrates - 31.7 g.

Energy value: 236.8 kcal / 991.6 kJ.

Product weight: 250 gr

Best before date: 365 days

Storage conditions: Not higher than - 18°C

Composition:

frozen onions, breading mixtures (flour (wheat, soy, rice), refined deodorized sunflower oil, antioxidants (E319, E330, E300), salt, yeast, emulsifiers (E471, E472e), drinking water, sugar, starches (corn , potato), baking powder E500(ii), acidity regulator E450(i), thickeners (E1422,

E1414), wheat gluten, dried egg white, ground black pepper), wheat flour, sugar, salt, thickeners (sodium alginate, E425(i)), refined deodorized sunflower oil, drinking water.

Description:

"This is something new!" - you say, crunching chicken popcorn while watching a movie. We are sure that the balls of the most tender fillet in a spicy breading, at the same time crispy and juicy, will not leave you indifferent, and you will be happy to stock your freezer with them.

The nutritional value: proteins - 14 g, fats - 9.1 g, carbohydrates - 13.3 g.

Expert Struvite complete dry food for adult cats of all breeds with struvite-type urolithiasis

MIRATORG EXPERT STRUVITE Complete dry food for adult cats of all breeds with struvite-type urolithiasis is intended for inclusion in complex therapy for struvite-type urolithiasis, as well as in the treatment of inflammatory diseases of the lower urinary tract of cats. A special combination of easily digestible protein

and low levels of magnesium, phosphorus, and calcium ensures optimal urine pH, which promotes dissolution and prevents the re-formation of struvite-type uroliths.

Indications for use:

- struvite type urolithiasis (dissolution and prevention of formation);
- oxalate type urolithiasis (prevention of formation)

Product weight: 0.4/1.5 kg.

Best before date: 540 days.

Ingredients:

rice, soy protein isolate, corn, dehydrated chicken meat, dehydrated egg, salmon oil, hydrolyzed animal proteins, animal fat, brewer's yeast, flax seeds, minerals, salt, calcium sulfate, vitamins, chicory extract, dried beet pulp, DL -methionine, marigold extract.

Nutrient content per 100 g:

- Protein – 34.5%
- Fat – 14.0%
- Ash – 6.2%
- Fiber – 2.1%
- Calcium – 0.8%
- Phosphorus – 0.7%
- Omega 3 – 0.9%
- Omega 6 – 2.2%
- Moisture – 6.0%

Added substances:

- Vitamin A – 25,000 IU/kg
- Vitamin D3 – 1,000 IU/kg
- Vitamin C - 200 mg/kg
- Vitamin E - 600 mg/kg
- Vitamin K3 – 1.4 mg/kg
- Vitamin B1 – 7.6 mg/kg
- Vitamin B2 – 4.1 mg/kg

- Vitamin B3 – 39 mg/kg
- Vitamin B4 – 5,267 mg/kg
- Vitamin B5 – 6.3 mg/kg
- Vitamin B6 – 4.0 mg/kg
- Vitamin B7 – 90 mcg/kg
- Vitamin B9 – 1,225 mcg/kg
- Vitamin B12 - 161 mcg/kg
- Potassium – 1.0%
- Magnesium – 50 mg/100 g
- Iron – 17.0 mg/100 g
- Iodine - 0.16 mg/100 g
- Copper – 1.2 mg/100 g
- Manganese – 8.4 mg/100 g
- Zinc – 16.8 mg/100 g
- Taurine – 241 mg/100 g

Energy value: 394 kcal.

Feeding recommendations

| Cat weight, kg | 2,5 | 3 | 3,5 | 4 | 5 | 6 | 7 | 8 |
|------------------|-----|----|-----|----|----|----|----|-----|
| Feed rate, g/day | 47 | 53 | 59 | 64 | 75 | 84 | 93 | 102 |

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The minimum period of use of diet therapy is at least 5 weeks. The average duration of dissolution of struvite-type uroliths is 5-12 weeks. To ensure a preventive effect, it is recommended to use the food for 6 months under the supervision of a veterinarian and regular monitoring of basic indicators of the pet's condition: general clinical condition, urinalysis, ultrasound and radiological signs of urolithiasis. .

Contraindications:

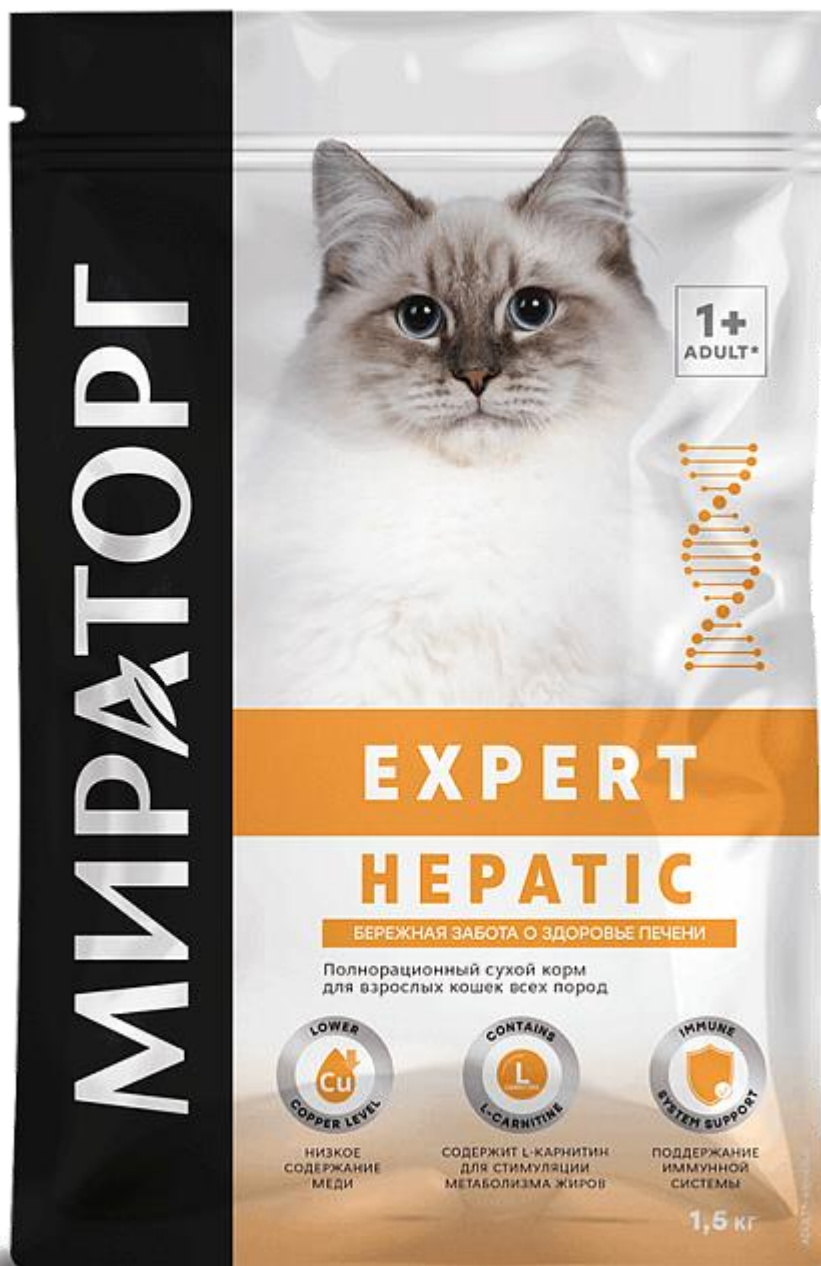

renal failure and metabolic disorders with a tendency to acidosis, the use of drugs that help acidify urine*

* when using drugs in therapy that provide additional acidification of urine, therapy should be carried out under the supervision of a veterinary specialist

Expert Hepatic complete dry food for adult cats of all breeds "Gentle care for liver health"

MIRATORG EXPERT HEPATIC Complete dry food "Gentle care for liver health" for adult cats of all breeds was created to be included in the complex therapy of liver diseases in adult cats. Contains easily digestible nutrients, a low level of protein to prevent the accumulation of ammonia metabolic products in the blood serum (ammonia), a high content of vitamin E and group B. The high energy value ensures a small serving

volume, which is especially important when the pet's appetite is reduced during the period of illness, promoting

Indications for use:

- chronic liver failure,
- portosystemic shunts,
- hepatic encephalopathy
- chronic hepatitis

Product weight: 0.4 kg/1.5 kg.

Best before date: 540 days.

Ingredients:

Rice, animal fat, dehydrated chicken meat, soy protein isolate, vegetable protein extract, salmon oil, dehydrated egg, minerals, hydrolyzed animal proteins, dietary fiber (including chicory extract), dried beet pulp, vitamins, seeds flax, brewer's yeast, calcium carbonate, mannan oligosaccharides (MOS), milk thistle extract, marigold extract, L-carnitine.

Nutrient content per 100 g:

|------------------|-----|----|-----|----|----|----|----|----|
| Feed rate, g/day | 43 | 49 | 54 | 60 | 69 | 78 | 87 | 95 |

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The duration of the course of diet therapy for liver diseases depends on the diagnosis and can range from 2 to 12 weeks. When diagnosing portosystemic shunts, diet therapy is used during the period of preparation for surgery and in the postoperative period until the shunt is completely closed. If inoperable portosystemic shunts and/or incomplete postoperative closure are detected, the diet is recommended for lifelong use. For

a more effective effect of diet therapy, it is recommended to follow a fractional feeding regimen: divide the daily intake into several feedings and offer it to your pet at regular intervals (every 4-6-8 hours). Make sure your pet always has clean drinking water.

Contraindications

hepatolipidosis without encephalopathy*

chronic cholangiohepatitis**

pregnancy, lactation, growth***

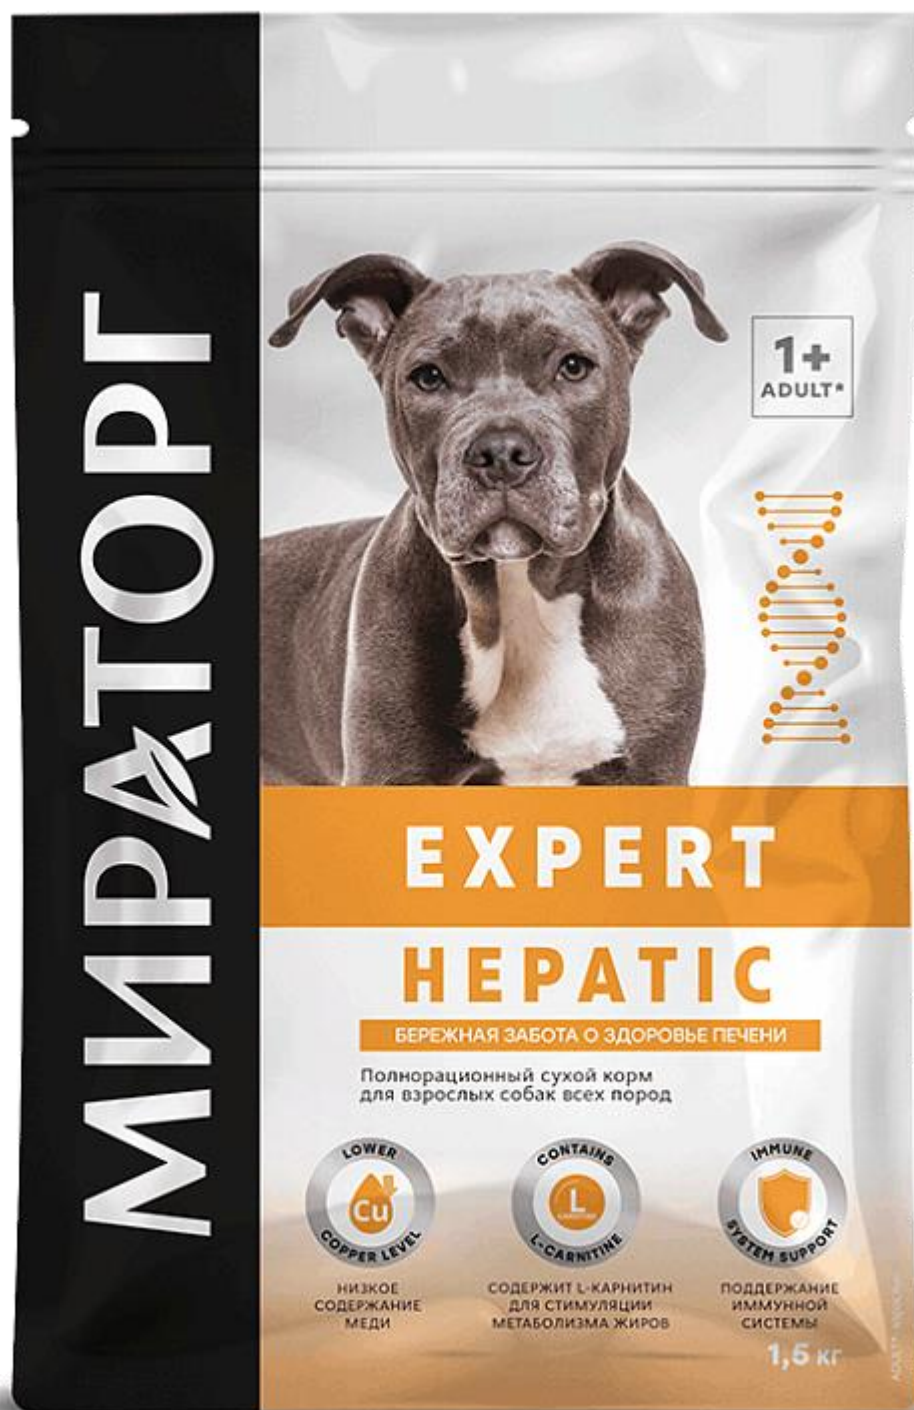

Individual intolerance

*,** the use of the GASTROINTESTINAL diet is recommended;

***under the supervision of a veterinary nutritionist

Complete dry food Expert Renal for adult dogs of all breeds with kidney disease

Complete dry food MIRATORG EXPERT RENAL "Gentle care for kidney health" for adult dogs of all breeds was created to be included in a complex therapy for kidney diseases. Low protein content and limited phosphorus content help slow the progression of kidney failure. The high calorie content helps to quickly saturate the pet with a small serving size. Antioxidants and optimal mineral composition prevent the

development of renal acidosis. High palatability prevents and slows down the progression of hypo- and anorexia in the later stages of the disease.

Indications for use

acute renal failure*; chronic renal failure**; prevention of metabolic acidosis and maintenance of optimal urine pH***

Contraindications

Pregnancy, lactation, growth*, individual intolerance

Recommendations for use and water

The minimum period of diet therapy is 26 weeks. The duration of the course depends on the diagnosis and clinical condition of the pet. If the diagnosis of renal failure is confirmed or if it progresses, the diet can be used for life. Regular monitoring of the pet's condition is recommended, in particular, the general clinical condition, changes in blood, urine, blood pressure and ultrasound signs of a previously diagnosed disease. Make sure your pet always has clean drinking water.

special instructions

Before using or extending a course of dietary therapy, consult your veterinarian.

Notes

*under the supervision of a veterinary nutritionist

** recommended for use from stage II according to IRIS

*** prevention of the formation of struvite type uroliths. Under the supervision of a veterinarian

Product Description:

Freshly squeezed grapefruit juice has an antioxidant effect due to the content of lycopene and quinine, and the vitamin-mineral complex of the fruit will compensate for the lack of vitamins A, B, E, potassium, magnesium and iron. The lemonade uses the hot filling method - the invigorating freshness and benefits of dietary citrus will remain in the drink much longer!

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Natural grapefruit juice, sugar, fresh grapefruit, drinking water.

Nutritional value per 100 g of product: proteins - 0.07 g; fats - 0.01 g; carbohydrates - 8.9 g.

Energy value: 35.3 kcal/147 kJ.

Product Description:

The beneficial properties of ginger have been known since ancient times. In lemonade and ginger lemonade, we preserve not only all its beneficial properties, but also its unique taste. And by adding natural lemon juice to ginger, we created lemonade, which became a real support for the immune system.

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Lemon, sugar, ginger, drinking water.

Orange lemonade with lemongrass

Product Description

Lemongrass has many beneficial properties, has an antioxidant and soothing effect. Thanks to innovative hot filling technology, lemonade retains all its beneficial properties, as well as its unique taste.

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Natural orange juice, fresh orange, sugar, lemongrass extract, drinking water

Nutritional value per 100 g of product: proteins - 0.06 g; fats - 0.01 g; carbohydrates - 9.07 g.

Energy value: 37.3 kcal/155 kJ.

Sea buckthorn fruit drink

Product Description:

The beneficial properties of sea buckthorn have been known to almost everyone since childhood. This berry not only has a pronounced aroma and a characteristic tart sweet and sour taste, but also contains many vitamins and minerals that can strengthen the immune system and increase performance at any time of the year. Thanks to the use of natural berries and innovative hot filling technology, our fruit drink not only retains all the beneficial properties of sea buckthorn, but also conveys the natural taste in full.

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Fresh frozen sea buckthorn berries, sugar, prepared water.

The minimum mass fraction of berry juice is 15%.

Nutritional value per 100 g of product: proteins - 0.23 g; fats - 1.83 g; carbohydrates - 10.05 g.

Energy value: 46.64 kcal/207 kJ.

Product Description:

We add only natural wild berries to the wild berry fruit drink. Thanks to innovative hot filling technology, the drink retains not only all the beneficial properties of wild berries, but also the unique taste of each berry.

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Fresh frozen blackberries, fresh frozen red currants, fresh frozen cherries, fresh frozen lingonberries, fresh frozen black currants, sugar, prepared water.

The minimum mass fraction of berry juice is 15%.

Nutritional value per 100 g of product (average value): proteins - 0.23 g; fats - 0.02 g; carbohydrates - 10.05 g.

Energy value: 81.45 kcal/314 kJ.

Product Description:

Our fruit drink made from wild-growing cranberries will appeal to all connoisseurs of natural taste, because, using innovative hot-filling technology, we retain all the beneficial properties and the incomparable sweet-sour, slightly bitter taste of natural cranberries.

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Fresh frozen cranberries, fresh frozen red currants, sugar, drinking water.

The minimum mass fraction of berry juice is 15%.

Nutritional value per 100 g of product (average value): proteins - 0.08 g; fats - 0.04 g; carbohydrates - 8.7 g.

Energy value: 43.2 kcal/178 kJ.

Product Description:

Black currant has a truly huge number of beneficial properties, from strengthening the immune system to increasing brain performance. Thanks to innovative hot filling technology, we carefully preserve all the beneficial properties and taste of this unique berry.

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Fresh frozen black currant, sugar, drinking water.

The minimum mass fraction of berry juice is 15%.

Nutritional value per 100 g of product (average value): proteins - 0.3 g; fats - 0.06 g; carbohydrates - 9.3 g.

Energy value: 44.2 kcal/184 kJ.

Product Description:

The taste of cherries has been familiar to us since childhood. In our fruit drink we use natural berries and fully preserve its unique taste and all its beneficial properties. This became possible thanks to quality control at all stages, from purchasing only selected berries from trusted suppliers to automated production using innovative hot filling technology, which allows you to preserve all the beneficial properties and taste of natural berries.

Product weight: 0.39 kg.

Best before date: 180 days.

Storage conditions: from 0 to +25°C.

Compound:

Fresh frozen boneless cherries, sugar, prepared water, cinnamon extract.

The minimum mass fraction of berry juice is 15%.

Nutritional value per 100 g of product (average value): proteins - 0.14 g; fats - 0.09; carbohydrates - 10.73 g.

Energy value: 44.04 kcal/184 kJ.

Canned complete food PRO MEAT with veal for adult dogs of small breeds for healthy digestion

The digestive system of adult small breed dogs is often sensitive to the composition of the food. PRO MEAT canned food with salmon was created especially for such dogs. Miratorg PRO MEAT super-premium food is created for animals with special taste preferences. The high content of fresh dietary meat, premium composition, adaptive level of fiber, vitamins and minerals will provide pets with energy for a healthy active life.

Delight your beloved pet with the new PRO MEAT food with a high content of fresh meat. Your cat is a real family member who sometimes needs a little more attention and care. During pregnancy and nursing, the mother cat needs more calories and proteins, because she gives all her strength and energy to the kittens. PRO MEAT special food is developed taking into account the needs of your pets. It is very important that kittens receive all the necessary nutrients before birth. The food contains minerals and vitamins to strengthen the immune system, proper formation of the musculoskeletal system and nervous system. The high content of easily digestible natural fresh meat and special types of fiber ensure a balanced intake of proteins, calcium and phosphorus necessary for a growing organism, as well as restoration of the health and immunity of a nursing cat. Thank your pet for his love and devotion with high-quality and healthy PRO MEAT dry food.

Black Angus beef meal with chicken hearts

For adult cats.

Cats are affectionate domestic carnivores. Especially for them, the Miratorg company created a unique product Winner BARF "Meat food from Black Angus beef with chicken hearts for adult cats."

Taking into account the special need of cats for complete protein, we have created a meat diet that fully provides animals with all the necessary amino acids.

"Black Angus Beef Meat with Chicken Hearts for Adult Cats" includes beef and offal (spleen and head meat), delicacy beef tongue, beef trachea for those who like to crunch on cartilage, as well as selected chicken meat. Shredded chicken heads are a natural source of calcium. Chicken liver, stomach and hearts give a special pronounced taste that cats like so much.

Vitamin and mineral premixes are added to balance the diet and ensure that cats need all the vital nutrients.

The product must be thawed before use. Approximate feeding rates are indicated on the packaging.

Do not feed frozen food to animals!

Black Angus Beef Meat Nutrition

For adult dogs of all breeds.

What dog would refuse a piece of juicy, flavorful meat? Especially for four-legged gourmets, the Miratorg company has created a unique product - raw "Black Angus beef food for adult dogs." What is unique? Selected fresh meat and by-products (tripe, liver, sublingual meat) are sources of amino acids, vitamin A and fatty acids essential for dogs. Ripe apples, herbs and vegetables support intestinal motility and ensure healthy digestion. Valuable Omega-6 and Omega-3 fatty acids from flax seeds and salmon oil add shine and make your pet's coat pleasant to the touch. The food does not contain poultry meat. Suitable for animals with a diagnosis of "Food allergy: chicken meat" confirmed by a veterinarian.

Product Description

"Homemade" cutlets "Miratorg" are a quick dish, your lifesaver when you want a tasty and quick lunch or dinner, just a few minutes in the frying pan - and a quick dinner is ready. Miratorg prepares cutlets according to a proprietary recipe from selected natural minced meat with the addition of spices and freezes them using the blast freezing method. Pair the cutlets with your favorite side dish, boiled or fried potatoes, buckwheat, pasta, vegetables and, of course, take them with you to work.

The nutritional value: proteins - 14 g, fats - 15 g, carbohydrates - 2 g.

Energy value: 200 kcal/830 kJ.

Product weight: 420 g

Best before date: 730 days.

Storage conditions: no higher than -18°C

Compound:

broiler chicken meat, beef, onion, wheat fiber, table salt, sugar, flavor and aroma enhancer E621, ground spices (red pepper, turmeric, ginger, coriander, black pepper, celery), acidity regulators (E451 (i) , E450 (i)).

Broiler chicken carcass, grade 1, frozen in a branded bag

Product Description

A chicken carcass is a godsend for those who dream of getting the perfect tobacco chicken. A special growing period allows you to obtain a low carcass weight, juicy and tasty meat, with a low cholesterol content.

Product weight: 1.3 kg.

Best before date: no more than 12 months.

Storage conditions: no higher than -18°C.

Compound:

1st grade broiler chicken carcass.

The nutritional value: protein at least 16 g; fat, including internal fat, no more than 14 g.

Energy value: 790 kJ/190 kcal.

Product Description

The appetizing Miratorg chicken schnitzel is the most tender and juicy meat in a golden-orange crispy breading. Delicious home-style chicken without GMOs and soy protein just needs to be reheated for 15 minutes without pre-defrosting - and you can enjoy a nutritious product at any time of the day.

The nutritional value: proteins - 13.2 g, fats - 10.2 g, carbohydrates - 14.2 g.

Energy value: 201 kcal/843.2 kJ.

Product weight: 360 g

Best before date: 425 days.

Storage conditions: no higher than -18 °C.

Compound:

frozen chicken meat, wheat flour, drinking water, refined deodorized sunflower oil, antioxidants (E319, E330), salt, yeast, starches (potato, pea, rice, tapioca), emulsifiers (E471, E472e), soy flour, flavor enhancer and aroma E621, flavorings, antioxidant ascorbic acid, sugar.

Frozen pork carbonate

Product Description:

Carbonade is ideal for preparing stews, deli meats and cold appetizers. The meat turns out soft and tender, for which gourmets highly value it. The Miratorg product is frozen using a unique shock freezing technology. Thanks to this, the carbonate retains the vitamins and minerals that pork is rich in.

Product weight: 0.850 kg

Best before date: 12 months

Storage conditions: Not higher than -18°C

Proteins - 17 g, Fats - 15 g

Energy value: 200 kcal

Compound: Pork carbonate

Product Description:

The neck is one of the healthiest and most delicious cuts. Tender meat is rich in B vitamins, rare microelements and easily digestible proteins. The delicate taste of pork goes well with sweet, sour and sour sauces, and it can be prepared in different ways - each recipe reveals the taste of meat in a new way. Try it!

Product weight: 0.850 kg

Best before date: 12 months

Storage conditions: Not higher than -18°C

The nutritional value: Proteins - 13 g, Fats - 30 g

Energy value: 320 kcal

Compound: Pork neck

Product Description

Pork shoulder contains a lot of iron and iodine, as well as B vitamins necessary for the functioning of the nervous system. The meat is tender and relatively low in calories. The shoulder is considered a universal part - it is baked, grilled, delicacies and chops.

We recommend cooking this cut for a long time and slowly until the meat becomes juicy and soft. This is necessary so that the fibers are easily separated from the bone.

Product weight: 0.850 kg

Best before date: 12 months

Storage conditions: Not higher than -18°C

The nutritional value: Proteins - 13 g, Fats - 18 g

Energy value: 210 kcal

Compound: Pork shoulder

Product Description:

Pork ham is the most popular cut of pork with tender juicy meat and thin streaks of fat. Thanks to blast freezing technology and unique packaging, we preserve for you all the taste and beneficial properties of fresh meat. Wiener schnitzel, goulash are prepared from the ham, and baked in spices. Give it a try.

Product weight: 0.850 kg

Canned complete food for adult dogs of all breeds “Reducing the risk of allergies”

Complete canned food MIRATORG EXPERT HYPOALLERGENIC for adult dogs of all breeds is intended for inclusion in complex therapy and diagnosis of food intolerance and food allergies. Limited protein sources (salmon protein and highly purified soy protein isolate) help reduce the risk of food intolerance reactions and food allergies.

Indications for use

- Allergic reactions
- Gastrointestinal manifestations of food allergies
- Skin reactions caused by allergies

Contraindications

- Pregnancy, lactation, growth*
- Individual intolerance

special instructions

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water

The minimum period of use of diet therapy is at least 4 weeks. When including diet in the differential diagnosis of food allergies and food intolerance for up to 3 months.

Make sure your pet always has clean drinking water.

Canned complete food for adult dogs of all breeds “Gentle care for liver health”

Complete canned food MIRATORG EXPERT HEPATIC “Gentle care for liver health” for adult dogs of all breeds is intended for inclusion in the complex therapy of liver diseases. Contains easily digestible nutrients, a low level of protein to prevent the accumulation of ammonia metabolism products in the blood serum (ammonemia), a high content of vitamin E and group B. High energy value ensures a small serving volume, which is especially important when the pet’s appetite is reduced during the period of illness, promoting healthy nutrition. obtaining calories and energy for successful treatment and recovery.

Indications for use

- Chronic liver failure,
- Portosystemic shunts

- Hepatic encephalopathy
- Chronic hepatitis

Contraindications

- Hepatolipidosis without encephalopathy*
- Chronic cholangiohepatitis**
- Pregnancy, lactation, growth***
- Individual intolerance

special instructions

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water

The duration of the course of diet therapy for liver diseases depends on the diagnosis and can range from 2 to 12 weeks. If the diagnosis of portosystemic shunt is confirmed, diet therapy is used during the period of preparation for surgery and in the postoperative period until the shunt is completely closed. If inoperable portosystemic shunts and/or incomplete postoperative closure are detected, the diet is recommended for lifelong use. For a more effective effect of diet therapy, it is recommended to follow a fractional feeding regimen: divide the daily intake into several feedings and offer it to the pet at regular intervals (every 4 or 6 or 8 hours). Make sure that the pet always has clean drinking water.

Notes

*, ** the use of the GASTROINTESTINAL diet is recommended;

Canned complete food for overweight and obese dogs of all breeds "Gentle care for optimal weight"

Complete canned food MIRATORG EXPERT OBESITY "Gentle care for optimal weight" for adult cats of all breeds was created for inclusion in complex therapy for overweight and obesity. Low calorie and fat content, protein as the main source of energy helps reduce fat and preserve muscle mass during the treatment of obesity and maintain optimal body weight in pets prone to weight gain. The high fiber content contributes to a stable feeling of satiation in small portions.

Indications for use

- overweight and obesity
- chronic coprostasis

Contraindications

- Pregnancy,
- Lactation,
- Height*
- Individual intolerance

Recommendations for use and water

The duration of the course of diet therapy for overweight and obesity depends on their causes, physical activity and the pet’s diagnosis and can be up to 24 weeks. For more effective use of diet therapy, it is recommended to follow the feeding standards indicated on the packaging by the manufacturer and focus on the amount of food for the ideal (desired) weight, and not the current weight of the pet. Make sure your pet always has clean drinking water.

Expert Struvite canned complete food for adult cats of all breeds with struvite-type urolithiasis

MIRATORG EXPERT STRUVITE Complete canned food for adult cats of all breeds with struvite-type urolithiasis is intended for inclusion in complex therapy for struvite-type urolithiasis, as well as in the treatment of inflammatory diseases of the lower urinary tract of cats. A special combination of easily digestible protein and low levels of magnesium, phosphorus, calcium, and high humidity of the diet

contribute to the dissolution and prevention of re-formation of struvite-type uroliths by maintaining optimal pH and specific gravity of urine.

Indications for use:

- struvite type urolithiasis (dissolution and prevention of formation)
- oxalate type urolithiasis (prevention of formation)

Product weight: 80

Best before date: 720 days.

Ingredients:

meat and meat ingredients – 34% (including fresh chicken breast), vegetable protein extract, dried beet pulp, salmon oil, dietary fiber, salt, minerals, amino acids, vitamins.

Nutrient content per 100 g:

- Protein – 9.5%
- Fat – 3.0%
- Ash – 1.0%
- Fiber – 1.2%
- Calcium – 0.18%
- Phosphorus – 0.16%
- Omega-3 - 0.2%
- Omega-6 - 0.3%
- Moisture – 80.5%

Added substances:

- Vitamin D3 - 187 IU/kg
- Vitamin C – 187 mg/kg
- Vitamin E – 280 mg/kg
- Vitamin B1 – 1.8 mg/kg
- Vitamin B2 – 1.3 mg/kg
- Vitamin B4 – 554 mg/kg
- Vitamin B5 – 1.0 mg/kg
- Vitamin B6 – 0.5 mg/kg

- Vitamin B7 – 37 mcg/kg
- Vitamin B9 – 205 mg/kg
- Vitamin B12 – 5.6 mg/kg
- Taurine – 746 mg/100 g
- Potassium – 0.1%
- Magnesium – 3.0 mg/100 g
- Manganese – 0.06 mg/100 g
- Zinc – 0.8 mg/100 g
- Iodine – 0.04 mg/100 g

Energy value per 100 g of product: 80.9 Kcal

Feeding recommendations

| Cat weight, kg | 3 | 4 | 5 | 6 |
|----------------|---------|---|---------|---------|
| Packs/day | 3 + 1/3 | 4 | 4 + 2/3 | 5 + 1/4 |

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The minimum period of use of diet therapy is at least 5 weeks. The average duration of dissolution of struvite-type uroliths is 5-12 weeks. To ensure a preventive effect, it is recommended to use the food for 6 months under the supervision of a veterinarian and regular monitoring of basic indicators of the pet's condition: general clinical condition, urinalysis, ultrasound and radiological signs of urolithiasis.

Contraindications:

kidney failure and metabolic disorders with a tendency to acidosis

use of medications that acidify urine*

pregnancy, lactation, growth**

individual intolerance

* when using drugs in therapy that provide additional acidification of urine, therapy should be carried out under the supervision of a veterinary specialist

**under the supervision of a veterinary nutritionist

Canned complete food Expert Renal for adult cats of all breeds with kidney diseases "Careful care for kidney health"

MIRATORG EXPERT RENAL Complete canned food "Careful care for kidney health" for adult cats of all breeds was created for inclusion in complex therapy for kidney diseases. Low protein content and limited phosphorus content help slow the progression of kidney failure. The high calorie content helps pets quickly become satisfied with small servings. Antioxidants and optimal mineral composition prevent the development of renal acidosis and hypertension in the later stages of the disease. High palatability prevents and slows down the progression of hypo- and anorexia in the later stages of the disease.

Indications for use:

- acute renal failure*

- chronic renal failure**

- prevention of metabolic acidosis and maintenance of optimal urine pH***

Product weight: 80

Best before date: 720 days.

Ingredients:

meat and meat ingredients – 34.4% (including fresh chicken), salmon fat, dried beet pulp, white fish, vegetable protein extract, wheat flour, minerals, vitamins, amino acids, dehydrated blood plasma, calcium carbonate .

Nutrient content per 100 g:

- Protein – 7.5%
- Fat – 8.0%

| 6 | 3 + 1/2 | | | | 60 | | | | 35 |

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The minimum period of diet therapy is 26 weeks. The duration of the course depends on the diagnosis and clinical condition of the pet. If the diagnosis of renal failure is confirmed or if it progresses, the diet can be used for life. Regular monitoring of the pet’s condition is recommended, in particular, the general clinical condition, changes in blood, urine, blood pressure and ultrasound signs of a previously diagnosed disease.

Contraindications:

Pregnancy, lactation, growth*

Individual intolerance

*under the supervision of a veterinary nutritionist

** recommended for use from stage II according to IRIS

*** prevention of the formation of struvite type uroliths. Under the supervision of a veterinarian

Canned complete food Expert Obesity for adult cats of all breeds with overweight and obesity “Gentle care for optimal weight”

MIRATORG EXPERT OBESITY Complete canned food "Careful care for optimal weight" for adult cats of all breeds was created for inclusion in complex therapy for overweight and obesity. Low calorie and fat content, protein as the main source of energy helps reduce fat and preserve muscle mass during the treatment of obesity and maintain optimal body weight in pets prone to weight gain. The high fiber content contributes to a stable feeling of satiation in small portions.

Indications for use:

- overweight and obesity
- chronic coprostasis

- megacolon syndrome

Product weight: 80

Best before date: 720 days.

Ingredients:

meat and meat ingredients – 22% (including fresh chicken breast, fresh beef), white fish – 5%, ground wheat, dehydrated blood plasma, dried vekla pulp, dietary fiber, salmon oil, minerals, dehydrated egg, plantain seeds, vitamins, amino acids, calcium carbonate, L-carnitine.

Nutrient content per 100 g:

- Protein – 8%
- Fat – 2.3%

|---|---|--|--|----|--|--|----|

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The duration of the course of diet therapy for overweight and obesity depends on their causes, physical activity and the pet's diagnosis and can be up to 24 weeks. For more effective use of diet therapy, it is recommended to follow the feeding standards indicated on the packaging by the manufacturer and focus on the amount of food for the ideal (desired) weight, and not the current weight of the pet. Make sure your pet always has clean drinking water.

Contraindications:

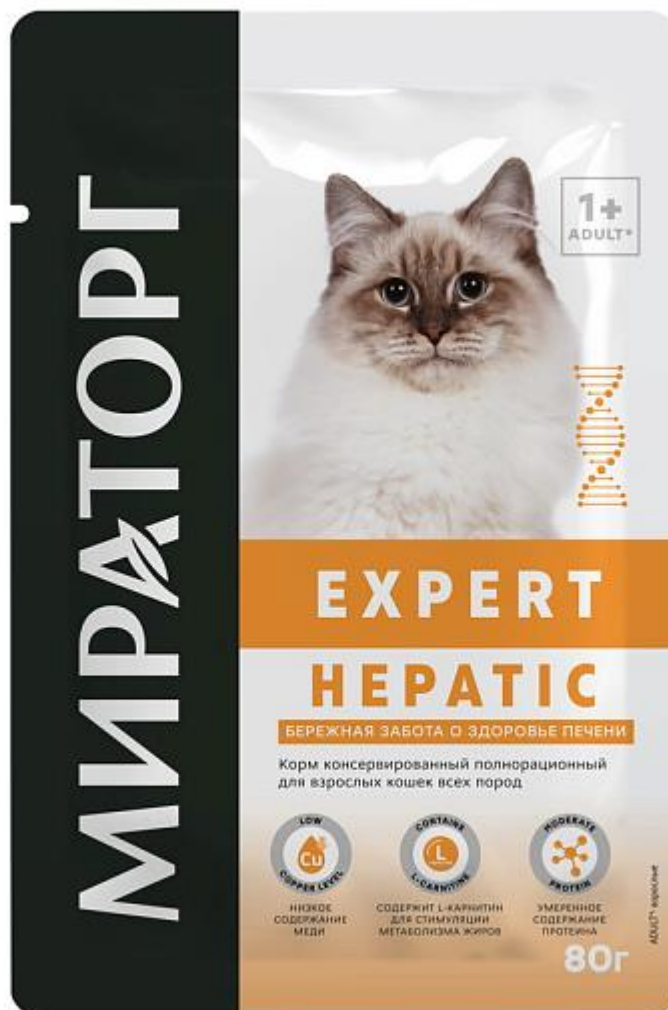

Pregnancy, lactation, growth*

Individual intolerance

*under the supervision of a veterinary nutritionist

Canned complete food Expert Hepatic for adult cats of all breeds “Gentle care for liver health”

MIRATORG EXPERT HEPATIC Complete canned food “Gentle care for liver health” for adult cats of all breeds was created to be included in the complex therapy of liver diseases in adult cats. Contains easily digestible nutrients, a low level of protein to prevent the accumulation of ammonia metabolism products in the blood serum (ammonemia), a high content of vitamin E and group B. High energy value ensures a small serving volume, which is especially important when the pet’s appetite is reduced during the period of illness, promoting healthy nutrition. obtaining calories and energy for successful treatment and recovery.

Indications for use:

- chronic liver failure
- portosystemic shunts

- hepatic encephalopathy
- chronic hepatitis

Product weight: 80

Best before date: 720 days.

Ingredients:

meat and meat ingredients – 32.5% (including fresh chicken breast, fresh turkey meat), rice flour, dehydrated egg, dried beet pulp, salmon oil, minerals, vitamins, amino acids, calcium carbonate, milk thistle extract, L-carnitine.

Nutrient content per 100 g:

- Protein – 8.0%
- Fat – 5.2%
- Ash – 1.2%
- Fiber – 0.7%
- Calcium – 0.15%
- Phosphorus – 0.16%
- Omega-3 - 0.21%
- Omega-6 - 0.8%
- Moisture – 76%

Added substances:

- Vitamin D3 - 250 IU/kg
- Vitamin C – 250 mg/kg
- Vitamin E – 375 mg/kg
- Vitamin B1 – 2.5 mg/kg
- Vitamin B2 – 1.8 mg/kg

| 5 | 3 + 1/2 | | | | 50 | | | | 30 |
| 6 | 4 | | | | 60 | | | | 35 |

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The duration of the course of diet therapy for liver diseases depends on the diagnosis and can range from 2 to 12 weeks. When diagnosing portosystemic shunts, diet therapy is used during the period of preparation for surgery and in the postoperative period until the shunt is completely closed. If inoperable portosystemic shunts and/or incomplete postoperative closure are detected, the diet is recommended for lifelong use.

Contraindications:

Hepatolipidosis without encephalopathy*

Chronic cholangiohepatitis**

Pregnancy, lactation, growth***

Individual intolerance

*, ** the use of the GASTROINTESTINAL diet is recommended;

***under the supervision of a veterinary nutritionist

Canned complete food Expert for adult cats of all breeds “Gentle care for digestion”

MIRATORG EXPERT GASTROINTESTINAL Complete canned food “Gentle Digestive Care” for adult cats of all breeds was created to be included in complex therapy for diseases of the digestive system of adult cats. Contains easily digestible nutrients and moderate levels of fat. The high content of B vitamins and minerals prevents the development of their deficiency during an exacerbation of the disease. High palatability and natural ingredients promote early development of appetite, prevent liver lipidosis and promote the pet’s recovery.

Indications for use:

- Decreased appetite or anorexia;
- Early resumption of feeding in the postoperative period;

- Acute and chronic gastritis
- Acute and chronic diarrhea
- Inflammatory bowel diseases (IBD)
- Colitis
- Maldigestion/malabsorption syndrome
- Excessive growth of bacterial flora in the small intestine

Product weight: 80

Best before date: 720 days.

Ingredients:

meat and meat ingredients – 29% (including fresh chicken breast, fresh lamb), salmon fat, dried beet pulp, rice flour, dehydrated blood plasma, dehydrated egg, minerals, dietary fiber (including extract chicory), vitamins, amino acids, mannanoligosaccharides (MOS).

Nutrient content per 100 g:

- Protein – 8%
- Fat – 4.7%
- Ash – 1.2%
- Fiber – 0.8%
- Calcium – 0.16%

| 6 | 4 + 1/2 | | | | 65 | | | | 45 |

Special instructions:

Before using or extending a course of dietary therapy, consult your veterinarian.

Recommendations for use and water:

The duration of the course of diet therapy for diseases of the gastrointestinal tract depends on the diagnosis and can range from 2 to 24 weeks. For a more effective effect of diet therapy, it is recommended to follow a fractional feeding regimen: divide the daily intake into several feedings and offer it to your pet at regular intervals (every 4-6-8 hours). Make sure your pet always has clean drinking water.

Contraindications:

Pregnancy, lactation, growth*

Individual intolerance

*under the supervision of a veterinary nutritionist
